

W502 – THERMAL ENVIRONMENT

**Robson Environmental invites you to attend this important
Internationally Accredited Course**

Duration: 5 days

When: 19 – 23 March 2012

Where: Cliftons Training Centre, 288 Edwards Street, Brisbane QLD, Australia

Cost: \$1,800 (discounts apply for multiple bookings)

Contact: 02 6239 5656 email: admin@robsonenviro.com.au Web: www.robsonenviro.com.au

This course will provide knowledge and understanding for Practitioners, Technicians, Supervisors, Managers and other persons who need to identify and manage thermal stress in the work place. This course provides technical knowledge and hands-on practical training at **INTERMEDIATE LEVEL** that will enable students to take measurements, assess exposure and check the effectiveness of control measures.

Persons with some knowledge of occupational health and safety or occupational hygiene will also benefit from advancing their knowledge, gaining a more detailed understanding of the thermal environment and its effect on workers.

On successful completion of this module students will be able to identify sources of thermal stress in the working environment; understand the nature of thermal strain and make an assessment of the thermal environment using appropriate techniques. Students will be able to assess the likely risk from exposure to thermal stress and suggest appropriate controls.

For more information regarding the course material please contact Robson Environmental or visit www.ohlearning.com

Lead Trainer: John Henderson
(COH, FAIOH)

Trainer: Carey Murphy
(COH, MAIOH)

Assisted by: Marcus Donnelly
(Cert IV WA&T; Int. Cert. W504)

TOPICS

The Thermal Spectrum

Principles

Effects of temperature extremes

Thermal comfort

Evaluation of hot environments

Control of hot environments

Thermal surveys

Evaluation of cold environments

Control of cold environments

Approaches to Risk Assessment

REGISTRATION

To register, complete the attached registration sheet.

A student enrolment pack will be provided on receipt of payment.
