SEMINAR DESCRIPTION

This full day seminar will address key concepts for the recognition, evaluation and control of RCS in workplaces. The content focuses on practical and relevant information across the following key areas:

- Occurrence of RCS
- Health effects of RCS
- Exposure Standards for RCS
- Exposure risk and incidence of disease
- Sampling & analytical methods
- Control of RCS exposure
- The future of RCS

The seminar will include a case study exercise and practical information for occupational hygienists and safety professionals to reinforce the major learning outcomes.
